

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Canceled)
2. (New) A method of producing oscillation data recording water, comprising:
 - preparing minerals containing Fe compound;
 - immersing said minerals containing Fe compound in a first purified water to produce water in contact with Fe compound;
 - preparing chemical salt for fixing oscillation data;
 - adding and stirring said minerals containing Fe compound and said chemical salt in a second purified water, at a predetermined ratio, and diluting a resulting mixed solution to a predetermined concentration,
 - wherein said oscillation data recording water records, through contact with a material or a living body, oscillation data existing at an electronic level within the material or living body.
3. (New) The method of claim 2, wherein said minerals containing Fe compound are reddish iron ores.
4. (New) The method of claim 2, wherein said minerals containing Fe compound have surfaces ground into a mirror finish.
5. (New) The method of claim 2, wherein the step of producing said water in contact with Fe compound further comprises immersing said minerals containing Fe compound at a ratio of 30-70g in 1,000 ml of said first purified water for 11-13 months,
 - and said diluting step further comprises adding 9-11 ml of said water in contact with Fe compound and 10g of said chemical salt to 10,000 ml of said second purified water, and stirring for more than 168 hours while holding water temperature at greater than 35°C.
